Ammunition:

Competitors in Excellence-in-Competition matches are required to furnish their own ammunition. Ammunition used must be similar to that manufactured for and issued through the service components. Specific guidelines are as follows: Ammunition may be commercially manufactured, or handloads. Projectile will be a full metal jacket with a pointed tip. No flat tip or round nose. The projectile may have a "ballistic" hollow point such as that used in the current military M852 style, 7.62mm arsenal match round. These guidelines will apply to all authorized service rifle calibers, i.e., 7.62mm (.308), 5.56mm (.223), and caliber .30 (.30-06).
